PROFESSIONAL PROFILE

Results-driven Information Security Analyst and Systems Engineer with 15+ years of experience in SOC operations, enterprise infrastructure, and virtualization. Skilled in threat detection, incident response, and SIEM investigations using Splunk and Microsoft Sentinel. Proven track record of reducing alert noise through intelligent tuning, developing MITRE ATT&CK-aligned detection use cases, and leading security operations at a Tier-1 financial institution. Combines deep technical expertise in endpoint, network, and cloud security with strong communication skills to effectively bridge the gap between security operations and business stakeholders.

PROFESSIONAL EXPERIENCE

Information Security Analyst II — CSOC | *TD Bank Group* | October 2022 – Present

- Perform SOC lead duties including platform health checks, peer reviews of analyst investigations, and escalation coordination with senior management.
- Monitor and respond to cyber alerts across all CSOC alert sources, ensuring timely handling and escalation within defined SLOs.
- Conduct SIEM investigations using Splunk and Microsoft Sentinel; identify and implement tuning opportunities to reduce false positive volumes.
- Conduct IOC searches across SIEM and endpoint detection platforms using threat intelligence feeds to proactively identify emerging threats.
- Investigate endpoint anomalies and conduct advanced process tree and lateral movement analysis using CrowdStrike Falcon and Microsoft Defender (MDE/MDI), mapping findings to the MITRE ATT&CK framework.
- Conduct Data Loss Prevention (DLP) assessments using Symantec to detect and investigate potential data exfiltration activity.
- Proactively monitor WAF traffic to identify and mitigate malicious patterns; conduct cross-functional validation with application teams and escalate advanced threats to L3.
- Collaborate with L3 teams on ongoing investigations and complex incident escalations.
- Manage cybersecurity incidents involving system- and user-based activity, serving as the team's representative to business stakeholders during active incidents.
- Deliver onboarding training for new analysts on SIEM and endpoint detection tools, and provide ongoing peer support.

Senior Systems & Virtualization Engineer | *ECG Qatar* | December 2016 – October 2022

- Designed and deployed VMware vSphere ESXi and vCenter infrastructure; managed vMotion (hot and cold migration) and vROPS monitoring.
- Designed, installed, configured, and administered SAN storage (Fibre Channel), iSCSI, NFS, and CIFS, including IBM Storwize V7K unified and block storage solutions.
- Managed SAN and Fibre Channel switches and performed P2V migrations using VMware vCenter Converter.
- Designed and maintained Microsoft Windows Server environments including Active Directory, DHCP, DNS, Group Policy, hardware load balancers, WSUS, Failover Clustering, and Hyper-V.
- Implemented and maintained Microsoft Exchange 2013 (mailbox management, backups, disaster recovery via NetBackup, and Lync 2013 administration), supporting 5,000+ users.
- Administered network security infrastructure including FortiGate NGFW, Juniper SSG 140, and Cisco ASA 5525-X firewalls.
- Conducted penetration testing using Kali Linux, including ARP poisoning, DoS simulation, man-in-the-middle attacks, and dictionary attacks.
- Built and maintained a Network Operations Centre (NOC) using PRTG and Lansweeper to continuously monitor network (MPLS, SDSL, ADSL), server, and virtualisation health.

- Implemented and administered an Elastic open-source EDR solution.

System Administrator | *ECG Qatar* | March 2014 – December 2016

- Managed virtual server infrastructure using VMware ESXi, vCenter (v5.0 & 5.5), and Microsoft Hyper-V.
- Administered Microsoft Windows Server (2003, 2008) environments, including File Server (deduplication, screening, and quotas), DNS, DHCP, Active Directory, and Group Policy.
- Managed IBM Domino Mail Server (v8.5 & 9.0) and Lotus Notes client environments.
- Designed, implemented, and maintained IBM Storwize V7K unified storage and Kaspersky Security Center endpoint protection.
- Managed user accounts, permissions, access rights, and storage allocations in accordance with security and regulatory compliance best practices.

Technical Support Engineer / System Administrator | *ECG Egypt* | May 2009 – March 2014

- Managed and maintained IBM Domino Mail Server; provided Lotus Notes client support for 5,000+ users.
- Deployed a VMware View cloud computing proof-of-concept; managed ESXi (v4.0 & 5.0) and vCenter environments.
- Led desktop and helpdesk support operations, resolving hardware and software issues with minimal business disruption.
- Configured and maintained print server infrastructure, including network printer security and sharing policies.
- Managed the KABA time and attendance system and McAfee email gateway.
- Recommended and performed hardware and software upgrades, patches, and reconfigurations as required.

TECHNICAL SKILLS

SIEM / SOC	Splunk, Microsoft Sentinel (Azure Sentinel), MITRE ATT&CK Framework
Endpoint Security	CrowdStrike Falcon, Microsoft Defender MDE/MDI, Kaspersky Security Center, Elastic EDR
Network Security	FortiGate NGFW, Juniper SSG 140, Cisco ASA 5525-X, Web Application Firewalls (WAF)
DLP / Email Sec.	Symantec DLP, McAfee Email Gateway, Proofpoint
Virtualisation	VMware ESXi 5.x–7.x, vCenter 5.x–7.x, vROPS, vMotion, VMware Converter, Microsoft Hyper-V
Storage	IBM Storwize V7K, Synology, FreeNAS, NetApp, SAN (FC), iSCSI, NFS, CIFS
Operating Systems	Windows Server 2008/2012/2016/2019, Linux (Debian, Kali, CentOS, RHEL), macOS
Networking	Cisco Catalyst Switches, Cisco Wireless Controller, MPLS, SDSL, ADSL, PRTG, Lansweeper
Microsoft 365	Exchange 2013, Active Directory, DHCP, DNS, Group Policy, WSUS, Failover Clustering
Other Tools	IBM Domino v8.5/9.0, IBM Traveler, Lync 2013, Titanium SFTP, Equitrac

CERTIFICATIONS

- Certified Ethical Hacker (CEH) v10
- VMware vSphere: Fast Track [v5.5]
- FortiGate NSE1
- Cisco Introduction to Cybersecurity
- Proofpoint Certified Phishing Specialist
- Mandiant Network Traffic Analysis
- Mandiant Incident Response for Everyone
- Security Blue Team: Introduction to Dark Web Operations

CURRENTLY PURSUING

- SANS GCFA (FOR508) — Advanced Incident Response, Threat Hunting & Digital Forensics
- Certified CyberDefender (CCD)
- CySA+

EDUCATION

Bachelor of Science — Information Systems
